Respiratory care is an immensely satisfying branch of physiotherapy. It challenges our intellect, exploits our handling skills and employs our humanity to the full.

Respiratory physiotherapy is both art and science. It is not an exact science, and effective treatment therefore depends on problem-solving. Analytic problem-solving requires the ability to define a problem and the knowledge to ...

[Clinical Guidelines: Cardiopulmonary - Physiopedia](#)

Physiotherapy-led cardiac rehabilitation is a clinical and cost-effective intervention for those living with cardiovascular disease.

What is cardiovascular disease?

Cardiovascular disease includes conditions such as angina, heart attack and stroke.

Heart disease is caused by a gradual build up of fatty deposits in the coronary arteries, causing them to narrow and leading to angina. If a piece ...
